Acme Analytics Sales and Discount Policy

Version 2.4 - effective 1 March 2026

1. Standard discount tiers

Sales representatives may offer volume discounts based on the annual contract value (ACV). Contracts with an ACV from 10,000 to 24,999 USD receive a 5 percent discount. Contracts from 25,000 to 99,999 USD receive a 10 percent discount. Contracts of 100,000 USD or more receive a 15 percent discount.

Multi-year prepayment earns an additional 3 percent discount for a two-year commitment and an additional 5 percent for a three-year commitment. Discounts from different tiers are additive, but the total discount may never exceed 25 percent without written approval.

2. Special programs

Verified non-profit organizations and accredited educational institutions receive a flat 20 percent discount on all plans. This discount cannot be combined with volume discounts. Eligibility must be confirmed with a registration document before the order is created.

Startups with fewer than 25 employees and less than 2 million USD in funding may apply for the Launch Program, which provides 50 percent off the first 12 months of the Starter plan.

Customers who refer a new paying account earn a one-time referral credit of 500 USD once the referred customer has completed 60 days on a paid plan.

3. Approval rules

Any discount above 15 percent requires approval from the Regional Sales Director. Any discount above 25 percent requires approval from the VP of Sales. Approvals must be recorded in the CRM before a quote is sent to the customer.

Promotional coupon codes are valid for one order only and expire 90 days after issue. Coupons cannot be applied retroactively to orders that have already been invoiced.
